SKILLS

- **Languages:** Spanish, HTML5, CSS, JavaScript, SQL
- **Technical:** Project Management, Google and Microsoft Suites, First Aid/AED/CPR
- **Technologies:** jQuery, Moment.js, Node.js, Express.js, Sequelize

PROFESSIONAL EXPERIENCE

Web Developer   August 2020–Present
Representative Projects: Austin, TX

- ***It's a Blog's Life:*** A full-stack weblog app built on NodeJS. Share your thoughts, find new friends, and give feedback to other's content in the form of comments and likes. Made using Handlebars, Materialize, jQuery, Node, and various node packages including Express and Passport. Access *It's a Blog's Life* and create your own blog here: its-a-blogs-life.herokuapp.com
- ***Survive 2020:*** A choose-your-own-adventure, text-based game that parodies 2020 and its various crises where the user's choices determine the ending. *Survive 2020* was made in collaboration using HTML5, CSS, JavaScript, jQuery, Moment.js, and various APIS. Access *Survive 2020* here: mattmoe1.github.io/Survive-2020
- ***Weather Dashboard:*** A dynamically generating weather dashboard, wherein user inputs a city and, using the OpenWeatherMap API, the daily weather and a five-day forecast for that city's weather is generated. Made using HTML5, CSS, and JavaScript. Access the weather dashboard here: caersun.github.io/weatherdash

Teacher, *AP Biology*   August 2018–July 2020
IDEA Montopolis College Preparatory, IDEA Public Schools   Austin, TX

- Constructed curriculum, managed classroom including grading, behavior, and tutoring, and implemented targeted plans for individual students, driving student achievement for historically low-performing cohorts

Writing Consultant   Aug. 15, 2016–May 2018
University of North Texas, Writing Center   Denton, TX

- Tutored clients one-on-one on their English writing, grammar, and planning skills through collaborative discussion
- Developed plans with long-term clients for how to tackle long-form writing, projects, and theses

Researcher, *SEA-PHAGES*   August 2014–May 2016
Howard Hughes Medical Institute   Denton, TX

- Collaborated to isolate bacteriophage DNA and submitted phage genome for sequencing under Dr. Lee Hughes
- Analyzed and annotated bacteriophage genome through BLAST bioinformatics
